

Special Edition Grafikline Mask by hyphen sports

Comfortable, adjustable, washable, re-usable, sustainable.

These re-usable masks reduce the danger of infecting others by halting the spread of viruses and bacteria. In addition, the masks help prevent you from touching sensitive areas of your face with contaminated hands.

hyphen sports masks are not a certified medical product, but are designed for general use. These Special Edition masks were designed and made in darker fabrics with the needs of automotive, workshop and other trades in mind.

- Made from a double layer of materials, washable at 60°C.
- Integrated, adjustable nose-bridge (plastic).
- The outer layer is made from a polyester fabric that has very good filtering, and water (droplets) resistant, properties.
- The inner layer is made from a specially produced knitted cotton fabric (Puntex®) which has a high droplet blocking capacity as well as an anti-bacterial finish (as tested by the University of Padua, Italy).
- The materials are certified to OEKOTEX® Class I, Allergy UK and bluesign, are free from any allergenic or toxic products so are very kind to your skin. The fabric also has a high UV protection rate.
- Adjustable fit with a nose bridge and by means of two, separate fabric ties at your nape and at the back of your head.
- The ties are made from fabric, not elastic, so will not stretch with frequent washing.
- MADE IN EUROPE. Designed in Germany and made in Croatia from Italian fabrics.
